To ensure the correct and safe use of the product, please be sure to
read this instruction manual before use.

Intelligent sushi cutting machine

One-button automatic roll cutting, efficient and safe
Lightweight, safety protection device, roll cutting specifications:
8-cut, 10-cut, 12-cut optional

Superior performance

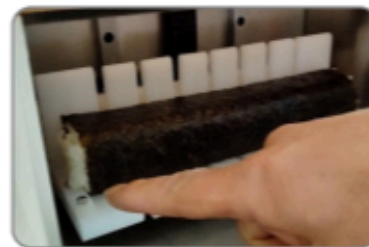

1. Easy to operate, just press the left and right start buttons at the same time.
2. High safety, with emergency stop buttons on both sides.
3. The blade can be easily replaced.
4. Good sealing to prevent dust pollution.
5. The bracket, knife holder and dust cover are easy to disassemble and assemble.

OPERATION TUTORIAL

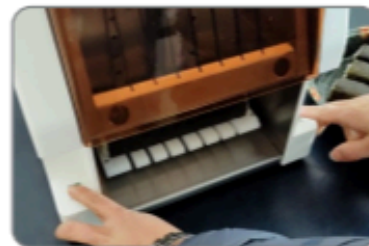

1. Turn on the power switch of the machine side door.

2. Put the rice rolls into the tray with both hands. Pay attention to the rice rolls being placed flat on the inside and not outside the limit.

3. Press the cutting and rolling switch with the index fingers of both hands at the same time.

4. The machine cuts off quickly and stops. Remove the cut rice rolls and place them on the tray.

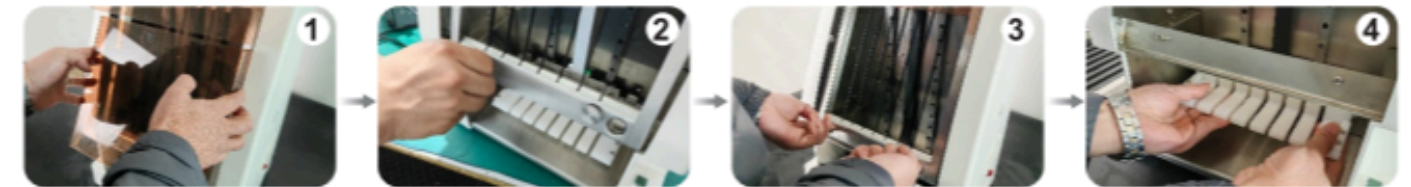

MOLD REPLACEMENT

Notice! Before changing the mold, be sure to turn off the power.

REMOVAL OF THE MOLD

1. Hold the lower protective cover with both hands, press it inward, and then take out the lower protective cover.
2. Use your fingers to press the lower edge of the upper protective cover and push upward to loosen the nuts on both sides of the knife holder.
3. Place the index fingers of both hands into the two round holes under the knife holder, then lift it up and gently take out the knife holder.
4. Hold the pallet with both hands, gently lift it up, and take out the pallet.

MOLD INSTALLATION

5. Hold the support plate with both hands, align it with the card slot, and then press it down gently to check whether it is flat and install the support plate.
6. Hold the tool holder with both hands, align it with the tool holder slot and lift it up, then align it with the lower hole slot and put it in. Finally, tighten the nuts on both sides of the tool holder to lock the tool holder.
7. Hold the edge of the lower protective cover with both hands, align the holes with the balls on both sides, and press in to complete the installation.
